## Product Features:

- Austenite structure weld metal, good heat, corrosion and crack resistance, better inter-granular corrosion resistance than 316.
- Weld metal contains Mo element to get good inter-granular crevice corrosion resistance.
- High Silicon content with good bead appearance & better wettability.

## Applications:

- Suitable for welding of severe acid and high heat resistance required SUS316 stainless steel.

## Shielding gas:

- Ar + 1~2% O<sub>2</sub> (MIG)
